

Maths - Money

Your task today is to use all your new maths skills to create your own shop at your house!

1. First, collect items from around your house to pretend to sell in your shop (always ask an adult first).
2. Make price labels so the shoppers know how much each item costs.
3. Make some pretend money to give to your shoppers to spend. Use the pictures below for inspiration.
4. Give people in your household some of your pretend money and ask them to visit your shop!
5. Add up how much their items cost and write a receipt for them.
6. How much money are they paying with? Work out their change.
7. Don't forget to write down your working out and send us a photograph of your shop and all your calculations.
