

Maths Feedback

In yesterday's lesson, this question tricked a lot of people:

- 6 Calculate the perimeter of the rectangle.

Give your answer in centimetres.

Make sure you always check the units of measure. If you got the answer 16, this is the measurement of the perimeter in metres. How many centimetres are in 16m?

Remember, mistakes are the best way to learn! Well done for stretching your brains by challenging yourselves in your learning.
