

Thursday 14th January 2021 - Science Lesson 1

Last term we were learning about the digestive system.

Your task is to create a song, rap or poem to teach other people everything you have learnt – you could even make up dance moves or actions!

Key information you could use:

You can write down your ideas then email us a picture of it or you can record a video of you performing your rap to send to us. You could even teach it to your family and get them involved too!
