

Wednesday 6th January

Year 4 Party Planning Task - Maths

(Base Camp)

Challenge

You are going to persuade Mr Spotwood and Mrs Wordsworth that you are going to work so hard during lockdown that you deserve an end of year party. You will have to plan an exciting party with food, decorations and prizes.

You have a **maximum budget of £30** – you cannot spend more than this!
You don't have to spend the whole budget, but you can't be a penny over.

You are planning the party for your table group of 3 or 4 children.
Use the price list below to look at different types of food and drink available.

Think about:

- what food and drink you are going to buy;
- how many of each type of food you will need;
- whether you have included food for vegetarians;
- what games and prizes you will have for your friends.

Show your working clearly in your home learning book.

Main Food	Price per pack
